-----  
Will managed network services gain momentum in Asia Pacific in 2025?

ISG expects contracting for managed network services to gain momentum in Asia Pacific in 2025. Falling interest rates and rising interest in broad digital transformation engagements are expected to generate growth, particularly among companies in retail, manufacturing, transportation, energy and the banking, financial services and insurance sector.

Why are adaptable services important in Asia Pacific?

"Adaptable services that meet evolving industry requirements help clients compete and grow." The 2024 ISG Provider Lens(TM) Enterprise Managed Network Services report for Asia Pacific finds that companies in the region are quickly adopting new technologies to replace legacy infrastructure.

Is NaaS the fastest growing segment of enterprise network services?

NaaS is the smallest but the fastest-growing segment of the enterprise network services market in the region. Increased internet access in Asia Pacific is driving moderate growth in direct internet access (DIA) services, which give enterprises an exclusive ISP link for applications that require high performance and security, the report says.
