What is a rakworx Smart Modular data center?

RakworX's Prefabricated Smart Modular Data Center (MDC) is an energy-efficient,high-performance solution with natural air cooling for a PUE as low as 1.1. It's a fully contained,adaptable data center designed for rapid deployment,scalability,and growth. Our Small Chamber add-on optimizes airflow,enhancing cooling by containing cold air.

Does Eco-mode reduce data center energy consumption?

This paper shows that eco-mode provides a reduction of approximately 2%in data center energy consumption and explains the various limitations and concerns that arise from eco-mode use. Situations where these operating modes are recommended and contraindicated are also described.

How can flex optimize your AI data center racks?

Optimize your AI data center racks with Flex's ORv3-compliant or fully custom designsbuilt for AI and high-density workloads with global reach and local customization.

What can flex do for your data center?

Reduce lead timeswith supply chain efficiency and localized production capabilities. Regionally customized rack solutions engineered for your data center. Flex incorporates robotics and automation,including robotic welding and stamping,to enhance precision and production efficiency.
