What is Volvo's new research and Development Center in Gothenburg?

Established in 2022, the company has set up a research and development center in Gothenburg to build on the battery expertise within both companies and develop next-generation, state-of-the-art battery cells and vehicle integration technologies, specifically developed for use in Volvo cars.

What's going on in Gothenburg?

Gothenburg is a hub for innovation and at the forefront of sustainable industry. Now a battery cluster is taking shape, characterised by something that has served the region well: collaboration. Near Volvo Car's production plant and new battery assembly factory in Torslunda, a gigafactory is under construction.

Will the Gigafactory in Gothenburg accelerate the shift to electrification?

"The gigafactory in Gothenburg will accelerate the shift to electrification, and will be one of the largest battery cell manufacturing plants in Europe. This is clearly the kind of impact we aimed for when we co-founded Northvolt.

Cytena is a biotechnology company and developer of a single-cell printing technology designed to assist contact-free deposition of single cells encapsulated in micro ...

Grid-scale energy storage solutions are urgently needed to store renewable energy and balance our grids. It's not always windy and ...
