What are RV solar panels?

Solar panels are the heart of your RV solar system. They're usually mounted on the roof and made of silicon cells that generate DC electricity when hit by sunlight. Think of them as your "fuel pump," pumping energy from the sun into your RV system. Panels come in two main types:

What is the solar market like in Sweden?

The market leans towards specialization, where companies such as SVEA Renewable Solar AB and Exeger Sweden AB focus on specific niches in solar technology. Despite the presence of larger conglomerates like Vattenfall AB, the market is fairly fragmented with numerous smaller companies contributing to its dynamics.

Why should you choose an RV Solar System?

Charging from the sun is renewable energy at its best, meaning fewer fossil fuel emissions and less pollution on your trips. It feels great knowing you're camping sustainably. Overall, an RV solar system brings peace of mind and freedom. It's like having a mini power station riding on your roof - silently making power while you explore.

How do RV solar panels work?

Putting solar on your RV is simpler than it sounds: panels capture sunlight, a controller manages the charging, batteries store the power, and an inverter (if you need AC) converts it back to 110V. Let's break down each component and the flow of power: Solar panels are the heart of your RV solar system.

Always a step ahead - technology and innovation from Sweden We are proud manufacturers of motorhomes and caravans since 1958. With a ...
