-----  
Could solar power be the backbone of Ukraine's energy system?

The war against Ukraine has led to massive destruction of the energy infrastructure. One consequence of this is blackouts in cities. In the future, renewables such as wind and solar power could form the backbone of Ukraine's electricity system. (Image: Oleksii Maznychenko /Adobe Stock)

How will the energy storage bill affect Ukraine?

Adoption of the said bill will create conditions for the implementation of projects for the construction of energy storage systems in Ukraine, including at renewable energy facilities. As of today, the process of implementation of energy storage system projects including construction has already begun in Ukraine.

How much solar power does Ukraine have in 2024?

Figures from the Solar Energy Association of Ukraine (SEAU) earlier this year showed that the country added around 850MW of solar PV capacity in 2024, the majority of which came from self-consumption systems installed by businesses. It's "become a trend", Semenishyn says.

Can solar power help prevent corruption in Ukraine?

They have determined that solar and wind energy would quickly deliver a distributed power supply system and prevent corruption. The war against Ukraine has led to massive destruction of the energy infrastructure. One consequence of this is blackouts in cities.

Researchers at ETH Zurich have been working with researchers from Ukraine and Germany to investigate how to rebuild ...

In this Energy-Storage.news roundup, Hydrostor receives permitting approval for its California project, Hawaiian Electric is set to begin construction on ...
