Will Mexico collocate battery energy storage systems?

Future wind and solar energy projects in Mexico will be required to collocate battery energy storage systems equivalent to 30% of their capacity,a senior government official told the Senate on Tuesday.

Does battery storage provide services to the Mexican electric grid?

While battery storage does notcurrently provide services to the Mexican electric grid, and while several operational and regulatory challenges still need to be overcome,there is considerable potential for battery storage to offer valuable economic and reliability services going forward.

How does Mexico's regulatory landscape affect energy storage technology?

Mexico's regulatory landscape plays a significant role in adopting energy storage technologies. The initiatives introduced by the country's Energy Regulatory Commission (CRE) and the Secretary of Energy (SENER) can potentially drive investment and innovation in energy storage.

Will energy storage systems be integrated into the national electric system?

Earlier in March,Mexico introduced administrative provisions regulating the integration of energy storage systems into the National Electric System. It also revealed that the incorporation of 8,412 MW of energy storage systems is planned for the 2024-2038 fiscal year.

About Batteries International Magazine Distributed to over 90 countries worldwide, read by over 11,000 per quarter, Batteries International is the market leading magazine serving the battery ...

Many businesses adopt energy storage, but hurdles such as transmission rates and market limitations hinder cost-effective ...

Largest Lithium Battery in Mexico Working with Mitsubishi Electric Power Products, Inc. (MEPPI), ESI Inc
