-----

Sunny summer conditions delivered record photovoltaic (PV) production across much of western Europe in June 2025, as high pressure systems brought sustained clear ...

This March marked the third month in a row that Europe broke a historic power generation record. According to Eurelectric, solar now accounts for over 10% of the continent's ...

Hungary has achieved a major renewable energy milestone with solar power reaching a 25% share of the country's energy mix in 2024--the highest in the world, reports ...

How solar power, electrification and flexibility can help secure a bright future for Europe's energy transition

Perfect for urban families by enabling solar energy generation combined with battery storage, reducing reliance on traditional power sources. Provides backup power during ...

Looking ahead, for solar to continue meeting EU targets and providing low-cost energy to European citizens and companies, the EU and its Member States must improve the ...

Solar thermal technologies can be deployed in most European regions and are a particularly good option in Europe's eastern and south-eastern ...

The highest solar potential is concentrated in the Iberian Peninsula, the lowlands of Romania, and parts of Central-Eastern ...

Home Explainers How is EU electricity produced and sold? At EU level, renewables make up the largest share of power generation, ...

Solar plants totaling 66 GW were connected to the grid in EU countries last year, Ember reports. Solar generation overtook coal for the first time as the EU gave up 15.7% (50 ...

Explore the insights of PV Europe! Learn about solar benefits, costs, and factors before installation. Find out if solar energy is worth it in ...

The EU Market Outlook for Solar Power 2022-2026 contains an updated forecast for the EU solar market in 2022 and projections of the evolution of the market through 2026.

In our recent LinkedIn post highlighting the increase in solar output this year - a near 22% gain in Western Europe - we considered some of the drivers that contributed to that ...

A home solar system is a common way to lower energy costs and adopt sustainable living. Harnessing the sun lets you become energy-independent from power ...

Sunrock soars, winning the Gold European Solar Sustainability Award 2025 SolarPower Europe is the award-winning link between policymakers and the solar PV value ...

Solar power generation surpasses coal for the first time in the European Union, despite a slowdown in year-on-year growth. Credit: ...
