Which power plants are located in Rotterdam?

This hub in Rotterdam consists of two power plants: the coal and biomass power plant Maasvlakte Power Plant 3 (MPP3) and the natural gas power plant Utility Center Maasvlakte Left Bank (UCML). Uniper Maasvlakte Energy Hub: a perfect place! Here, 7% of the Netherlands' electricity is generated, demonstrating the importance of this location.

Will Eneco and EP NL invest in a battery storage project?

The storage project will make use of the plant's existing grid connection. But while making the announcement, the two companies were vocal about costly obstacles in the Netherlands for batteries. Eneco and EP NL have announced a joint investment in a 50 MW /200 MWh battery storage project at the Enecogen power plant in the port of Rotterdam.

Why is Rotterdam launching a new battery in 2027?

Due to come online in 2027, the battery at the power plant in Rotterdam port will provide more flexibility for the Dutch electricity system. "It's fantastic that we can invest in this new battery, which is a breakthrough after years of development.

How will enecogen & EP NL handle battery development in the Netherlands?

Enecogen will handle the battery's maintenance and operations, while the trading departments of EP NL and Eneco will control its deployment. No financial details were announced. In the announcement, the companies noted that battery development in the Netherlands lags behind other European countries, citing grid fees as a primary obstacle.
