How much solar energy is installed in Cuba?

The installed solar energy generating capacity in Cuba is around 3 megawatts, or 0.07 % of the total installed capacity. And there are several projects underway to increase this percentage, although costs remain a serious obstacle. Increase in energy production from solar devices in Cuba since 2001:

Is there a problem with solar power in Cuba?

Another hurdle for the expansion of solar power in the residential sector lies in the electricity tariff subsidy, which is charged in a devalued currency. According to official figures, around six percent of the more than four million households in Cuba consume more than 500 kilowatt hours (kWh) per month.

Why is Cuba importing portable generators?

A man starts up a gasoline-powered generator in the town of Batabanó, Mayabeque province, Cuba. The country's energy problems have fuelled the importation of portable generators in the face of the frequent power cuts caused by the energy crisis in this Caribbean island nation. Are solar panels a good investment?

"Solar panels are the best, there is no fuel cost or noise. But they need to be sold with real incentives in order for more people to invest in them," entrepreneur Félix Morffi, 86, a former mid-level technician in machinery and tool repair and a tenacious advocate of clean energy opportunities, told IPS.
